ENR 1.14 AIR TRAFFIC INCIDENTS

1. Definitions of air traffic incidents

Accident

An event connected with the operation of an aircraft which, in the case of manned aircraft, occurs between the time a person boards the aircraft with the intention of undertaking the flight and the time all persons are disembarked or, in the case of unmanned aircraft, between the time the aircraft is ready to proceed with a view to undertaking a flight and the time it is brought to a standstill at the end of the flight and the primary propulsion system is switched off, in which:

a) A person suffers serious or fatal injuries as a result of:

- his or her presence in the aircraft; or,
- direct contact with any part of the aircraft, including parts that have become detached from the aircraft; or,
- direct exposure to jet blast,

unless the injuries are the result of natural causes, are inflicted on the person by himself or by a third party, or are sustained by stowaways concealed outside the areas normally reserved for passengers and crew; or

b) The aircraft suffers damage or structural failure that adversely affects the structural strength, performance or flight characteristics and that would normally require substantial repair or replacement of the affected component, except in the case of engine failure or failure, when the damage is limited to a single engine (including its shielding or accessories), to the propellers, wing tips, antennas, probes, blades, tires, brakes, wheels, fairings, panels, landing gear doors, windshields, aircraft skin (such as minor dents or punctures), or in the case of minor damage to the propellers, main blades, landing gear, and damage caused by hail or bird strike (including radome punctures); or

c) The aircraft disappears or becomes completely inaccessible;

Serious Incident

An incident related to the operation of an aircraft involving circumstances indicating that there was a high probability of an accident occurring, which, in the case of manned aircraft, occurs between the time a person boards the aircraft for a flight and the time all persons are disembarked or, in the case of unmanned aircraft, between the time the aircraft is ready to proceed for a flight and the time it is grounded at the end of the flight and the primary propulsion system is shut down.

Incident

An occurrence, other than an accident, associated with the operation of an aircraft and which affects or may affect the safety of operations.

Occurrence

A safety-related event that endangers or, if not corrected or resolved, could endanger

an aircraft, its occupants or other persons; occurrences include, in particular, accidents and serious incidents.

2. Use of the air traffic incident reporting form

Accident and serious Incident Reports to GPIAAF are mandatory for:

Pilots, aircraft operators, air traffic controllers and air traffic control supervisors, and Airport/Aerodrome Directors.

Accidents and serious Incidents reported to GPIAAF must be reported also to ANAC - Autoridade Nacional de Aviação Civil, by the persons designated in Article 4 of Regulation (EU) No. 376/2014 of the European Parliament and of the Council of 3 April 2014, preferably through its organisation.

Occurrences must be reported to ANAC within a maximum period of 72 hours by:

- a) The pilot-in-command or, in cases where the pilot-in-command is unable to report the occurrence, another crew member following him in the chain of command of an aircraft registered in a Member State or of an aircraft registered outside the Union but used by an operator for which a Member State ensures oversight of operations, or by an operator established in the Union;
- b) Persons performing functions related to the design, construction, management of continuing airworthiness, maintenance or modification of an aircraft, or of equipment or parts related to it, under the supervision of a Member State or the Agency;
- c) Persons who sign the airworthiness review certificates, or the placing into service of an aircraft, or of equipment or parts related to it, under the supervision of a Member State or the Agency;
- d) Persons performing functions for which an authorisation by a Member State is required as an agent of an air traffic service provider with responsibility in the area of air navigation services or as a person responsible for flight information services;
- e) Persons performing functions related to the security management of airports to which Regulation (EC) No 1008/2008 of the European Parliament and of the Council (2) applies;
- f) Persons performing functions related to the installation, modification, maintenance, repair, inspection, in-flight check or inspection of air navigation facilities under the supervision of a Member State;
- g) Persons performing functions related to ground handling of aircraft, including refuelling, preparation of cargo manifest, loading, de-icing and towing at an airport covered by Regulation (EC) No 1008/2008.

3. Reporting procedures

Pilots must:

- Report immediately by radio to the appropriate ATC unit any incident that took place during flight, providing ATC unit with the pertinent data;

- If unable to do it during flight, report must be done upon arrival.

Other Entities must:

- Report any accident and serious incident occurrence they have knowledge of, to GPIAAF and to ANAC, including Occurrences.

Reports must be addressed to:

GPIAAF - Gabinete de Prevenção e Investigação de Acidentes com Aeronaves e de Acidentes Ferroviários (for contacts see [GEN-1.1](#)).

and also to:

ANAC - Autoridade Nacional de Aviação Civil

URL ECCAIRS: <https://e2.aviationreporting.eu/reporting>

E-mail: reportedeocorrencias@anac.pt

The Accident and serious Incident Reports must be addressed to GPIAAF and ANAC within 6 hours after the occurrence. Incident Reports should be addressed to GPIAAF within 48 hours after the occurrence.

Occurrences Reports must be sent to ANAC within 72 hours of the occurrence.

The Reports should be sent in paper form to the addresses shown on the top of the “AIRCRAFT ACCIDENT/INCIDENT REPORT” form or directly by Internet using the electronic form available at the following URL:

<http://www.gpiaaf.gov.pt>

The distribution of the on-line notification is made automatically in both entities.

The paper form is available at national AIS and ARO units at aerodromes and also an editable form in GPIAAF web site.

Guidance on how to fill the form, if needed, is also available on GPIAAF website.

Commission Implementing Regulation (EU) 2015/1018 of 29 June 2015 establishes a list with the classification of occurrences in civil aviation that must be mandatorily reported to ANAC, under Regulation (EU) No 376/2014 of the European Parliament and of the Council.

4. Purpose of reporting and handling of the form

The purpose of the form “Aircraft Accident/Incident Report” (Notificação de Acidente/incidente com Aeronaves), is to provide the GPIAAF with complete information on occurrences in order to determine the circumstances and probable causes of the occurrence with a view to the preservation of life and the avoidance of accidents e incidents in the future. It is not the purpose of the investigation to apportion blame or liability.

It also provides the same data to the national aeronautical authority, ANAC with the objective of contributing to the improvement of air safety by ensuring that relevant information on safety is reported, collected, stored, protected and disseminated. The sole objective of occurrence reporting is the prevention of accidents and incidents and not to attribute blame or liability.
